Since Adam isn't in this office, we'd better do a conference call. I'll send an invitation for 330 ET/1230 PT.

Stay tuned...

Ok, I've been through the checklist a couple of times and have some questions for you. Can we set up a call? Perhaps it would be a good time to introduce me to Adam if he is available. I am open this afternoon and much of tomorrow.

**Subject:** RE: Round Mountain

Thanks, Michele – we got a depressing amount of rain this weekend that we would have loved to send to California.

For the 2 weeks in question:

Anna is on vacation and unavailable.

Adam is wide open.

I am generally free every afternoon ET, except 12 to 2 Mondays, and both Wednesdays.

Thanks All! Enjoy your weekend.

Once EPA gets a better look I think we will likely want to meet with the state and verbally give them our comments so when you have the chance why don't you give me some suggested times for a call for the week of May 30. And June 6. Thanks!

**Subject:** Round Mountain

Hi Lisa and Michele,

Attached is the result of our preliminary review of the Round Mountain aquifer exemption package. In general, we didn't find any "deal-breaking" concerns. On the shaded items, which respond to Michele's request for "high priority" items, additional clarification would be helpful.

A couple of notes:

- We combined the discussion of vertical and lateral confinement in the checklist. (In the Arroyo Grande checklist, we put the lateral confinement information in the section about hydraulically connected water wells, but it seemed like a good idea to put all of this related information in one row.)
- Given the timing for completing this early review, and the amount of information submitted, we were unable to read the over 10,000 pages of the submittal (much of which was scanned PDFs without OCR). We focused the review on the 280 page AE application document and the communications between DOGGR and the Water Board. We may want to ask the state to provide some references/roadmaps to relevant files to facilitate these early reviews of future packages.

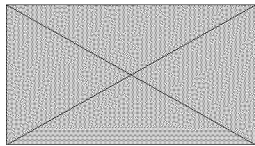

Have a great weekend, all.

PS. Also copied on this email is Adam Banasiak. Adam is a Cadmus geologist who works in our Oakland office, in case you need a West Coast presence.
